

Curriculum Management

The Subject Area Committees (SAC) are representative groups of district personnel across kindergarten through eighth grade within each content area. The SAC leader works with the SAC team, Director of Curriculum and school administrators to support curriculum, instruction, and assessment topics in alignment with the district vision. The SAC team makes professional recommendations pertaining to curriculum, instruction, student learning, and long-term evaluation of curriculum and instruction based on the curriculum review cycle.

After resource recommendations have been determined by the SAC and presented to the administrative team for approval, the resource(s) will be made available for all stakeholders' review in the district office. The materials will be available for public feedback for two weeks and participants will be asked to complete a short survey as a way to gather feedback for the administrative team and SAC.

The Director of Curriculum will review the stakeholder feedback and present a recommendation to the Board for resource adoption.

ADOPTED: December 15, 2015
